

New Release

Lavender Fairy Wings Collection

Enchanting Colours

Everyone will adore this delightful selection bred to be compact, fragrant and free-flowering, the Fairy Wings Collection will bring a little magic to every garden.

From world renowned breeders PGA Innovabred, known for pushing genetics further, innovating new colours, habits and foliage traits to the Lavender range for more than 20 years.

The Fairy Wings Collection consists of three varieties, Fairy Wings 'Radiance', Fairy Wings 'Spellbound' and Fairy Wings 'Whimsical'. With striking purple, radiant pink and subtle blush blooms to choose from, these flowers are set above heavily scented, neat compact foliage.

Breeder Howard Bentley commented " They are 'showy' plants, with larger wings and the three colours are very distinctive. The pale variety is a real shift in what we have seen from any other breeding program. All three varieties are cold tolerant, have a high disease resistance and given their parentage are tolerant to humidity, making them a great performing collection across our diverse conditions."

Easily cared for and tolerant of dry, the Fairy Wings Collection boasts a similar garden performance to its sister plant Lavender 'The Princess' and 'Ghostly Princess'.

It would be difficult to find a more enchanting collection for any garden or patio - Lavender Fairy Wings Collection.
